

HEMATOLOGY RAPID STAIN

Super fast, intense
staining in

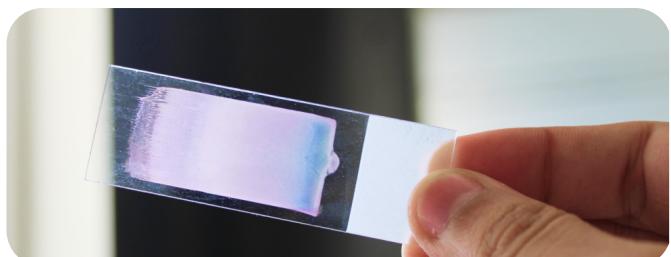

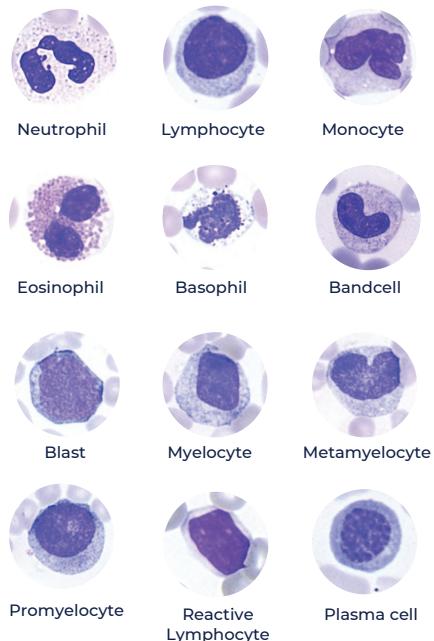

60 seconds

Analysis note table

Suitability for Blood smear microscopy	: Passes test
Erythrocytes	: Pink to brownish
Nuclei	: Red-violet
Eosinophilic granules	: Red to red-brown
Neutrophilic granules	: Pink to Light violet
Basophilic granules	: Blue
Lymphocyte cytoplasm	: Blue

Staining results.

This stain has been formulated with a stable combination of 8 different high quality dye compounds, that gives multiple colours and differential hues of same colour to different cellular components resulting in a clear contrasting field of view to make the cell differentials task easier.

Here's what our clients say about us.

“ Results are excellent

Time duration is less compared to conventional staining. Morphology wise excellent details. No background staining. All three types of cells are properly stained. Results are excellent.

Dr.Pramod Kumar
NIMS

“ Good quality

Quick and good staining quality.

Dr.Indu Sree
